RP15-A

15 Watt

1"x1"

Single & Dual Output

Description

The RP15-A series are ultraminiature power DC/DC converters in a case half the size of industry standard 15W converters. Despite their small size, the RP15-A converters are fully specified devices with output currents up to 4 Amps, no minimum load, 1600VDC isolation and low ripple/noise figures. The outputs are also fully protected against short circuits, overcurrent and overvoltage. The RP15-A series will find many uses in applications where board space and/or board height is at a premium.

Ordering Examples

RP15-2405SA/P = 24V Input, 5V Output, Positive Logic CTRL pin and Trim pin fitted

RP15-4805DA-HC = 48V Input, ±5V Output, Heat-sink fitted.

Notes:

Note3: Standard part is without suffixes and Trim and CTRL pins are not fitted.

add suffix "P" for CTRL function with positive logic (1=ON, 0=OFF) and trim pin for single output

add suffix "N" for CTRL function with negative logic (0=ON, 1=OFF) and trim pin for single output

Note4: add suffix -HC for premounted Heat-sink and clips

External Output Trimming

Output Voltage Trimming

Single output Powerline converters offer the feature of trimming the output voltage over a certain range around the nominal value by using external trim resistors. No general equation can be given for calculating the trim resistors, but the following trimtables give typical values for choosing these trimming resistors. If voltages between the given trim points are required, extrapolate between the two nearest given values to work out the resistor required or use a variable resistor to set the output voltage.
