Assembling Procedure

Plug

1. Fit the body, spring, coupling and bushing respectively in advance on wires having ends suitably treated, and then connect wires to terminals by crimp.
2. Then mount crimped contacts into the plug housing. After mounting, pull the wire slightly and make sure if the contact is mounted.
3. Fix a cable clamper to the bushing, insert it into the plug housing, and then crimp cable clamper with tool RP17-TC-01.
4. Assemble coupling, spring and body respectively to plug housing, and mount it with the attached screw by means of torque wrench (2 kg-cm), and the work is completed.
5. Put the cable bushing over the clamp body to complete the job.
