

# surface mount **EMI filters**

SPECTRUM CONTROL INC.  
Signal & Power Integrity Group

In 1968, Spectrum Control was founded as a solutions-oriented company designing and manufacturing products to suppress or eliminate electromagnetic interference (EMI). In the years that followed we adapted our core EMI filter technology into a complete line of capacitors, discrete filters, filtered arrays, filtered connectors, power filters, gaskets and shielding, microwave filters and power management products. Today, Spectrum Control offers the most experienced team of EMI engineering specialists and most extensive line of EMI filter products and packaged filter solutions.

Spectrum products are used in virtually all industries worldwide, including telecommunications, medical, government, military, aerospace, computer and industrial controls. In addition, we've secured preferred supplier status with many of the leading electronics OEMs around the world.

# surface mount EMI filters

With many years of experience in the design and manufacture of filters, Spectrum Control has a unique perspective on EMI and its control. We are now extending our filter expertise to the board level with our introduction of a complete line of surface mount EMI filters. Our family of surface mount inductors, low pass filters, high frequency filters and power filters is designed to offer high performance EMI filtering with a minimal PCB footprint.

Spectrum Control surface mount EMI filters are ideal for a wide range of PCB applications, including automotive electronics, digital A/V equipment, computers, peripherals, telecommunications, switching power supplies and high current buss lines.

# Spectrum Control's expertise

Spectrum Control is unique in providing an integrated approach to EMC problem solving by offering customer consulting, diagnostic testing, design and manufacturing services. As a fully integrated manufacturer, we are able to respond to short lead times and develop cost-effective solutions to satisfy your performance and budgetary needs.

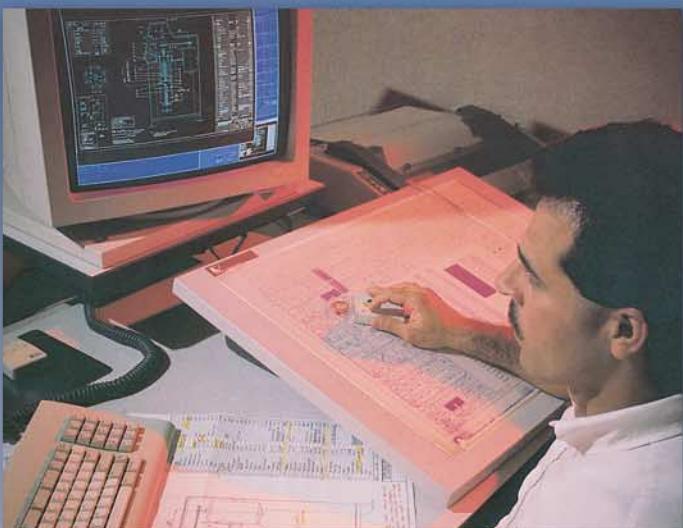

## test

- Spectrum Control's Test Facility provides a total solution for your compliance issues
- In-house anechoic chamber and shielding room
- NARTE certified engineering staff
- Tests available for:
  - European emission and immunity regulations (CE Mark)
  - FCC Part 15
  - MIL standard testing

## design

- In-house EMI and power conditioning specialists
- Comprehensive computer modeling
- Designs are "in-house" compliance verified
- Custom assemblies:
  - Incorporate EMI filtering, circuit breaker protection, transient suppression, voltage cut-off, power factor correction, harmonic suppression, remote sensing and other options to meet your specific requirements
  - Plug-and-play designs
  - Reduce your time to market
  - Lower your inventory needs

## manufacture

- Flexible factories
- Custom designs
- Spectrum Control, Inc. ISO 9001 certified
- Schedule sharing programs available
- Vertically integrated supplier

# EMC Testing Services

**Spectrum Control has the EMC expertise and in-house filter solutions you need to meet worldwide EMC standards.**

Our EMC testing services offer you a flexible resource to assist in product development by identifying and correcting EMI susceptibility and/or emission problems. Spectrum Control has a fully equipped EMC test laboratory and experienced engineering staff ready to solve demanding EMC challenges. For a modest daily fee we can test your equipment, determine state of compliance, and work with you in developing a viable solution. It is not uncommon for clients to leave our lab with a prototype in hand.

## EMC Lab Highlights

- NARTE Certified Staff
- Semi-anechoic chamber
- Computer controlled instrumentation
- Graphical data presentation in multiple formats
- Fiber optic video monitoring system

EN61000-4-4 Electrical Fast Transient

EN61000-4-5 Surge

EN61000-4-6 Conducted RF Immunity

SPECTRUM CONTROL INC.

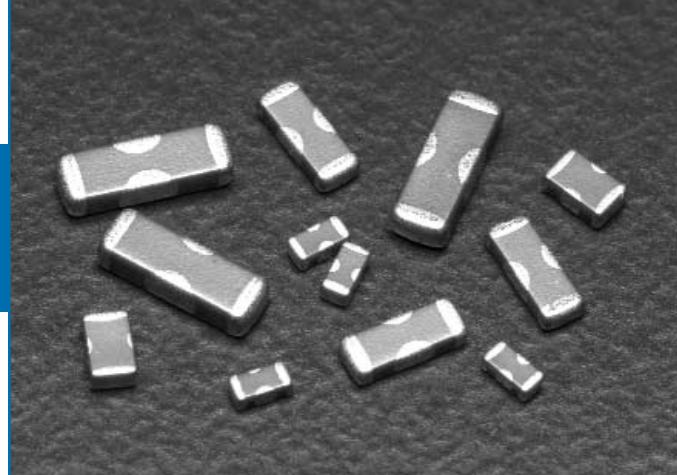

## Surface Mount EMI Filters Three Terminal Chips

### Features

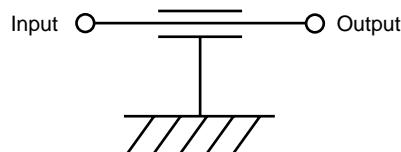

- Excellent performance in high current applications
- Non-polar, surface mountable
- Superior filtering characteristics
- Superb ability to withstand transient voltages and surge
- Offers exceptional solderability and resistance to solder heat
- Available in 0603, 0805, 1205 and 1806 body size
- Two amp current rating available
- Available lead free/RoHS Compliant

### Applications

- Cellular telephones and base stations
- Telecommunication equipment
- Industrial electronic interface or programmable controllers
- Electronic automotive equipment
- Computer and peripheral equipment

### Circuit Schematic

### Typical Electrical Characteristics

#### Capacitance

|                 |                               |
|-----------------|-------------------------------|
| Range . . . . . | COG (NPO) 22 pF to 470 pF     |
|                 | X7R 470 pF to 47,000 pF       |
|                 | YV5 100,000 pF and 220,000 pF |

#### Capacitance

|                     |                    |
|---------------------|--------------------|
| Tolerance . . . . . | COG (NPO) +50/-20% |
|                     | X7R +50/-20%       |
|                     | Y5V +80/-20%       |

#### Temperature

|                       |  |
|-----------------------|--|
| Coefficient . . . . . | COG (NPO) $0 \pm 30 \text{ ppm}/^\circ\text{C}$ ,<br>-55 to +125°C |
|                       | X7R +/-15%,<br>-55 to +125°C                                       |
|                       | Y5V -25 to +85°C   |

#### Insulation

|                      |                          |
|----------------------|--------------------------|
| Resistance . . . . . | up to 22,000 pF 10000 MΩ |
|                      | 47,000 pF 5000 MΩ        |

#### DC

|                      |                              |
|----------------------|------------------------------|
| Resistance . . . . . | 0.4 Amp or less 0.3 Ohm max. |
|                      | 1 Amp 0.08 Ohm max.          |
|                      | 2 Amp 0.04 Ohm max.          |

#### Rated

|                   |               |
|-------------------|---------------|
| Voltage . . . . . | up to 100 VDC |
|-------------------|---------------|

#### Rated

|                   |              |
|-------------------|--------------|
| Current . . . . . | up to 2 Amps |
|-------------------|--------------|

## Ordering Information

Example: **SF0805C221SBNCT**

This part number represents a three terminal chip with a body size of 0805 with a COG (NPO) dielectric. The capacitance is 220 pF with a capacitance tolerance of +50%/-20%. Voltage rating is 50 Volts DC. It has nickel barrier, solder plated terminations and a current rating of 0.4 Amp, (400 millamps). The parts are taped and reeled.

### Reflow Soldering

### General Soldering Notes

- High soldering temperatures and long soldering times can cause leaching of the termination and adversely affect adhesion. These conditions can also decrease capacitance value. Use the above recommended solder temperature cycle.
- Due to the mechanical characteristic of ceramic composition, aggressive thermal shock will degrade performance. Preheat the assembly before soldering using the above solder temperature profile as a guide.

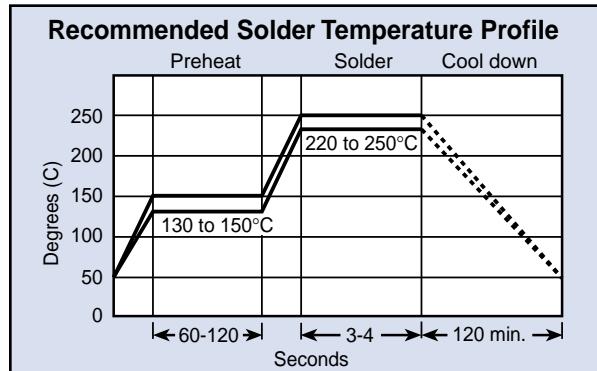

### Flow Soldering

- Use mild flux (less than 0.2% by weight of Chlorine), preferable rosin based. If water soluble, wash thoroughly to assure all residue is removed from the underside of components.
- Ultrasonic Cleaning  
When using an ultrasonic cleaning method, the following range is recommended:  
Frequency: Not to exceed 28KHz  
Output Power: Not to exceed 20W/liter  
Cleaning Time: 5 minutes max

SPECTRUM CONTROL INC.

## Surface Mount EMI Filters LC & LZ Type Chips

### LC Features

- High efficiency EMI surface mount filter
- Ideally suited for high frequency signal lines
- Steep insertion loss (IL) characteristics
- Available in 0603, 0805 and 1206 body sizes

### LC Typical Electrical Characteristics

#### Cut-off

*Frequency Ranges* ..... 10 MHz to 220 MHz  $\pm$  20%

*Rated Voltage* ..... 25 Volt

*Rated Current* ..... 100 mA

*IR* ..... 10 M $\Omega$  min.

#### Operating

*Temperature Range* ..... -40°C to +85°C

### LZ Features

- Monolithic construction of dielectric and ferrite materials
- Band stop filter with a choice of rejected frequency band
- Little delay and distortion from original signal wave
- Available in the 0402 and 0603 body sizes

### LZ Typical Electrical Characteristics

#### Center

*Frequency Ranges* ..... 10 MHz to 2,000 MHz  $\pm$  20%

*Rated Current* ..... 50 mA and 100 mA

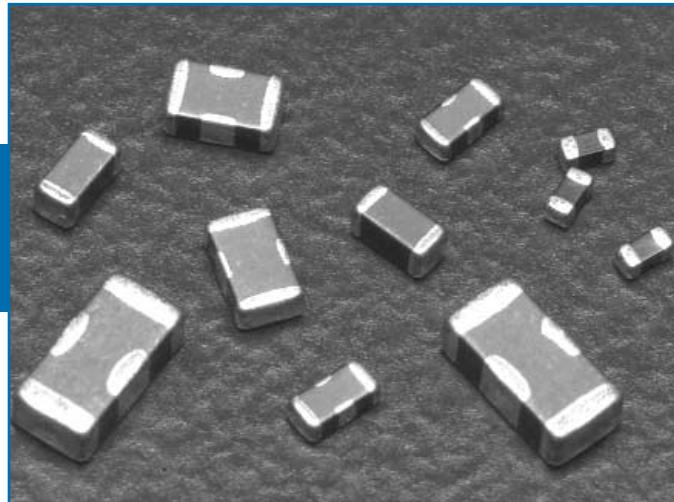

*Rejected Bandwidth* ..... 0.5 dec. to 1.5 dec.

#### Operating

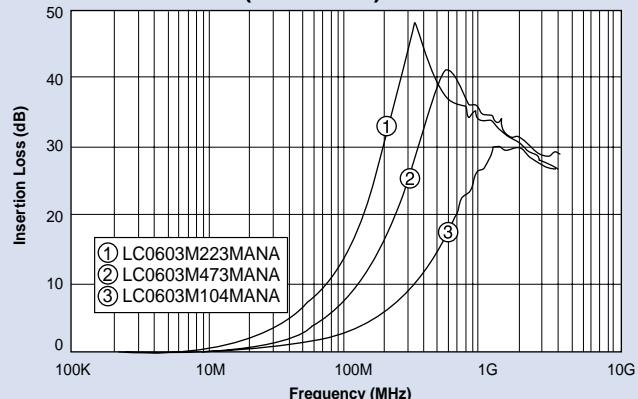

*Temperature Range* ..... -25°C to +85°C

### LC/LZ Applications

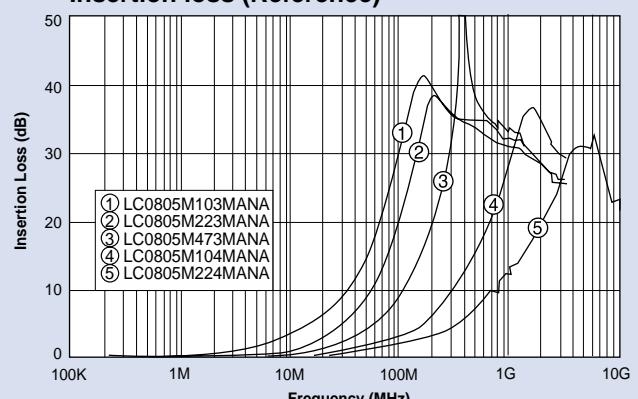

- Telecommunication equipment, fax, modem, and ADSL
- Computer and peripheral equipment
- Digital AV equipment, such as TV, VCR and DVD
- Digital circuit equipment noise countermeasure

\* Denotes packaging style, replace with T for tape and reel or B for bulk

### Ordering Information

Example: **LC1206M223MANAT**

This part number represents an LC EMI filter chip with a body size of 1206. The cut-off frequency is 22 MHz with a tolerance of ± 20%, voltage rating is 25 Volts DC. It has nickel barrier, solder plated termination and a current rating of 0.1 Amp (100 millamps). The parts are taped and reeled.

| LC    | 1206 | M223              | M                 | A             | N                             | A                  | T                 |

SPECTRUM CONTROL INC.

## Surface Mount Filter Arrays SA Series

### Features

- The filter's structure minimizes residual inductance with a high self resonant frequency, ensuring large insertion loss in a wide band.
- The common ground electrode built into the chip ensures complete grounding of all lines at the ground on both ends. The filter is designed to control cross talk.
- An optimum constant can be selected from the capacity range of 22-22,000 pF to best suit the frequency.
- Solder plated nickel barrier terminations offer good solderability and resistance to soldering heat.
- Available lead free/RoHs Compliant

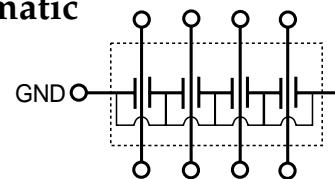

### Applications

- Noise reduction for DC lines on computers
- Computer peripheral equipment
- Digital TV & VTR
- Cellular telephones
- Automotive electronics

### Typical Electrical Characteristics

|                             |                    |
|-----------------------------|--------------------|
| Rated Voltage .....         | 25 VDC to 50 VDC   |
| Rated Current.....          | 0.3 Amps           |
| IR .....                    | 10,000 MΩ Min.     |
| DC Resistance.....          | 0.3 Ω Max.         |
| Temperature Range .....     | -55°C to +125°C    |
| Capacitance Range .....     | 22 pF to 22,000 pF |
| Capacitance Tolerance ..... | ±20%               |

## Surface Mount Low Pass Filters MSM, SSM, RSM & PSM Series

### MSM - Miniature Surface Mount Chip Capacitors

The MSM series filters feature high temperature construction and have current ratings up to 10 Amps. The filter chips will hardly allow residual inductance and the self-resonant frequency extends to the microwave band. Applications include telecommunication equipment, computer and peripheral equipment and digital AV equipment, medical equipment, DC power supply lines.

- Miniature footprint help in dense circuit configuration
- Rated at 10 Amps
- Packaged in tape and reel or bulk form
- Operating temperature ranges of -25°C to +85°C and -55°C to +125°C
- Available lead free/RoHs Compliant

### SSM - Square Surface Mount Filters

The SSM series filters feature high temperature construction and have current ratings up to 10 Amps. The filter chip series are non-polar and surface mountable with excellent performance characteristics and come in a Pi circuit configuration. Applications include telecommunication equipment, computer and peripheral equipment, digital AV equipment, power amplifiers, power supplies and high current bus lines.

- Square mechanical geometry enhances SMT soldering
- Rated to 10 Amps
- Packaged in tape and reel or bulk form
- Operating temperature range of -55°C to +125°C
- Available lead free/RoHs Compliant

### RSM - Round Surface Mount Filters

The RSM series filters feature high temperature construction and have current ratings up to 10 Amps. The filter chip series are non-polar and surface mountable with excellent performance characteristics and come in a Pi circuit configuration. Applications include telecommunication equipment, computer and peripheral equipment, digital AV equipment, power amplifiers, power supplies and high current bus lines.

- Round mechanical geometry enhances SMT soldering
- Rated to 10 Amps
- Packaged in tape and reel or bulk form
- Operating temperature range of -55°C to +125°C
- Available lead free/RoHs Compliant

### PSM - Power Surface Mount Filters

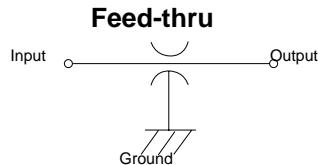

The PSM series filters feature high temperature construction and have current ratings up to 20 Amps. This filter series is non-polar and surface mountable with excellent performance characteristics and come in either a Feed-thru or Pi circuit configuration. Applications include telecommunication equipment, computer and peripheral equipment, digital AV equipment, power amplifiers, power supplies and high current bus lines.

- Provides time and costs saving compared to thru-hole filters
- Rated to 20 Amps
- Packaged in tape and reel or bulk form
- Operating temperature range of -55°C to +125°C
- Available lead free/RoHs Compliant

### Technical Notes

- Soldering recommendations supplied upon request
- Reflow temperature limit is 250°C
- Unit weight is approximately 0.4 grams
- Tape and reel packaging available for automated assembly

### PSM Tape and Reel Packaging

### PSM Recommended Board Pattern

# Thru-hole Filters

## High Frequency PCB Filters

The economical High Frequency PCB Filter offers electrical characteristics which allow many devices to meet most government and industry specifications for EMI control, while providing good electrostatic discharge protection.

A lossy ferrite filter with a center ground lead is terminated within the filter's thermoset epoxy body.

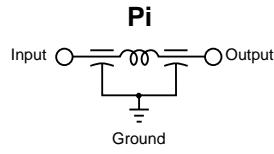

The High Frequency PCB Filter offers savings three ways. First is the low cost of the filter assembly. Second is the economy of installation. Three silver plated leads are inserted into holes in a printed circuit board which has a ground path circuit, for conventional flows-soldering with other components. No special mounting plate or brackets are needed and when the holes are placed as recommended in a .062 (1.57mm) thick board, no lead trimming is required. Elimination of hand soldering provides opportunities for improved quality in addition to applied-cost benefits.

A third savings results from placing a filter at the source of an EMI problem, potentially eliminating the need for additional filtering at other points in the circuit.

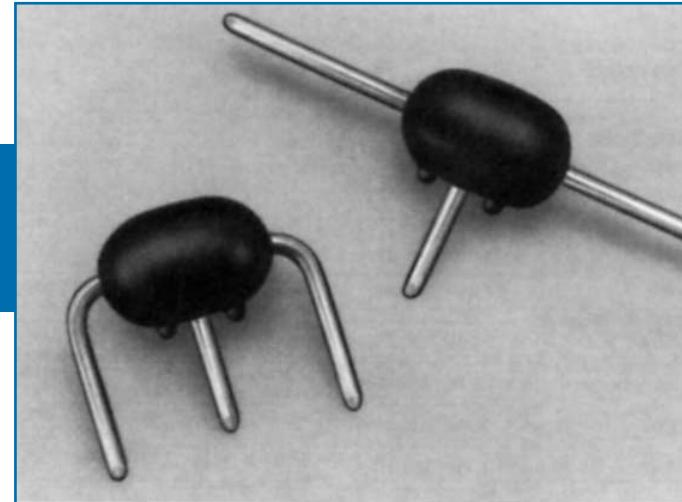

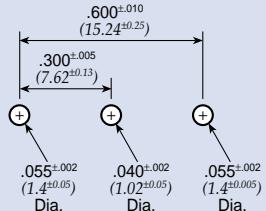

### Features

- Provides EMI filtering to protect low power digital circuits - helps equipment meet FCC and VDE specifications
- Mounts directly to printed circuit board with no bracket or plate for lower applied costs - can be flow soldered with other components
- Encapsulated for environmental protection
- Mounts on PCB to begin filtering at the source of the problem
- Built-in standoffs permit cleaning or coating under the filter

### Schematic

## Mini Surface Mount Power Filters MSP Series

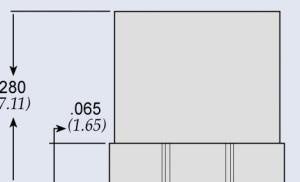

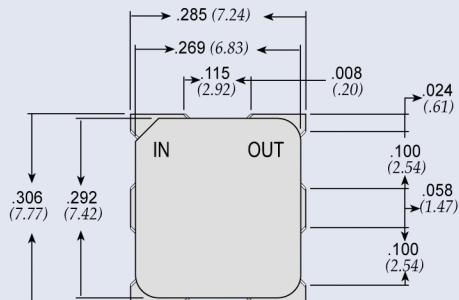

### Features

- Designed for 10A DC power lines
- Offers high insertion loss in a wide frequency band by combining feed through capacitors, multilayer ceramic capacitors and ferrite bead inductors with high self resonance frequency.
- Compact EMI package with plus and minus lines

### Applications

- Electronic measuring instruments
- Industrial equipment
- Automotive electronics
- Switching power supplies
- DC-DC converters

## Miniature PCB Power Filters MPC Series

Tested and found to be  
IAW VDE 0565 Part 3

### 61-MPC Series

Rugged construction design enables parts to perform in industrial environments. The 61-MPC series is ideally suited for products that must conform to FCC part 15 regulations. Agency approvals: UL recognized, CSA certified, TUV approved (tested and found to be in accordance with VDE 0565 Part 30). Applications include;

- Personal computers and peripherals
- Measuring instruments
- Home appliances and vacuum cleaners
- Monitor and display units
- Switching power supplies
- Available lead free/RoHs Compliant

### 11-MPC Series

Power filters are available in PCB mount, bolt-in, fast-on tab or solder lug. The 11-MPC series is ideally suited for products that have been limited board space and require a low cost alternative. Available in both metal and plastic cases. Applications include;

- Personal computers and peripherals
- Digital equipment
- Measuring instruments and medical equipment
- TV & VCR monitors and display units
- Available lead free/RoHs Compliant

### MPC-010/-015 Series

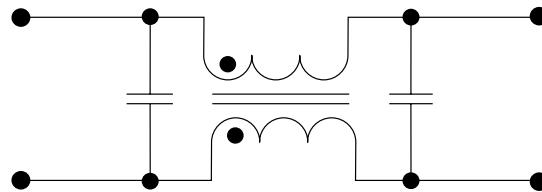

The compact design of the MPC-010 and -015 series power filters integrates a feed thru capacitor, multilayer ceramic capacitor and ferrite bead inductors. This series is ideally suited for dense PCBs and where both positive and negative lines have reduce EMI in one housing. Applications include;

- DC power lines on industrial equipment
- Measuring instruments
- Home appliances and vacuum cleaners
- Monitor and display units
- Switching power supplies
- Available lead free/RoHs Compliant

# a control products systems company

## signal & power integrity products

Ferrite beads & inductors  
Surface mount filters  
Discrete EMI filters  
Filter plates  
Filter connectors  
Gaskets & shielding  
Ceramic capacitors  
Single line filters  
Filtered terminal blocks  
Power entry & power line filters  
Military/multisection filters  
EMC testing

## frequency control products

Lumped element filters  
Cavity filters  
Bandpass filters & duplexers  
Tubular & waveguide filters  
Tower mounted amplifiers  
Coaxial resonators  
Patch antennas & assemblies  
Switchable filter bank assemblies  
Hybrid, modular & GPS low noise amplifiers  
Local oscillator doublers  
Microwave synthesizers  
Cougles  
Integrated microwave sub-assemblies  
Power amplifiers  
RF mixers  
Voltage controlled oscillators (VCOs)  
Dielectric resonator oscillators (DROs)
